

BioBoost

High Performance Probiotic Paste

Rapid response & recovery
Promotes immunity

BioBoost's micro-encapsulated, multi-strain probiotic promotes immunity, recovery and improves digestion. Rapidly absorbed, delivers powerful Probiotics and Vitamin E at elevated levels.

Ideal for animals of any age that are stressed, sick or at weaning.

Product Code: DFABB300
BioBoost – Probiotic Paste 300g Tube

Active Constituents

Lactic Acid Bacteria at no less than 1,000,000,000 cfu/g:

Enterococcus faecium, Lactobacillus acidophilus, Bifidobacterium longum, Lactobacillus plantarum, Pediococcus pentosaceus, Lactobacillus casei, Bacillus subtilis.

Total Yeast at no less than 1,000,000,000 cfu/g:
Saccharomyces cerevisiae

Vitamin E: 10 IU/g

Directions

- 5g per Calf
- 15g per Cow
- Feed at any stage of stress, illness, weaning and after use of antibiotics.

STORE IN COOL, DRY PLACE.

Product Code: DFABBD
BioBoost – 300g Applicator

Product Code: DFABB80
BioBoost – Probiotic Paste 80g Syringe

Manufactured for: DASCO PTY LTD

BIOBOOST – ACTIVE CONSTITUENTS

Host specific Micro Encapsulated Probiotic Bacteria

- Host specific bacteria have specific key receptor sites for each host species that allow for more efficient attaching to the epithelium in the small intestine.
- **Micro encapsulation** ensures passage of the bacteria through the rumen to the lower GI tract, where they come to life, proliferate in the epithelium, crowd out pathogens and produce natural antibiotic compounds to combat pathogens and stimulate the calves innate immune system.

Bacillus Subtilis

- Bacillus subtilis is a very hardy spore bacteria that has been extensively studied on a genetic and functional level. There are several probiotic products in the pharmaceutical and agricultural markets that utilise this powerful probiotic and is well known for its efficacy.
- Bacillus subtilis is an extremely potent immune stimulator. It populates the epithelium in the lower intestines where it proliferates and out-competes pathogens, producing strong, natural antibiotic compounds. 70 to 80% of a mammal's immune function is driven from the lower GI tract. Supplementing for health in the lower GI tract is paramount in good calf rearing practice. BioCalf ensures this mode of action via daily delivery of powerful probiotics that work.

Active Live Yeast

- The live yeast formulated into BioCalf, *Saccharomyces cerevisiae* (SC), has been reported to have positive effects both directly and indirectly on the immune system and its subsequent biomarkers, thereby mitigating negative effects associated with stress and disease.
- SC has also been reported to simultaneously enhance growth and performance via increased dry matter intake and daily weight gain. It has also been shown to be a very strong rumen control agent, allowing the removal of antibiotic-based rumen control agents.
- SC also contains B vitamins, amino acids, minerals and vitamins.
