

**Dasco Nutra-Kel is a 35% pure kelp-based liquid vitamin and mineral supplement.**

- Maximised by a unique cold-enzyme extraction process.
- Rich in iodine (which helps livestock absorb the essential vitamins and minerals they need for overall health and energy).
- Fortified with vitamins A, D, and E.
- Includes 2% added trace minerals – Copper, Zinc, Iron, and Magnesium.
- Combined with the natural benefits of seaweed.
- +2% molasses for palatability.
- Recommended to be used in tandem with BioBoost for the best results.

Nutra-Kel is one of nature's most complete liquid prebiotic supplements – made with 100% sustainably-sourced King Island kelp.

Ideal as an oral tonic during sickness and/or recovery, and to restore valuable nutrients during and after climate challenges, or other stress events.

Also useful in adult cattle to improve fertility and support calving.

# VITAL ADDITION FOR YOUR CALF-REARING TOOLBOX

**Nutra-Kel, the newest addition to Daviesway's comprehensive calf-rearing arsenal, comes highly recommended by Daviesway's calf rearing specialist, Cindy Lucas.**

Dasco Nutra-Kel is a 35% pure kelp-based liquid vitamin and mineral supplement – maximised by unique cold-enzyme processing. It carries significantly higher amounts of seaweed of leading industry competitors, in addition to trace minerals, vitamins, alginates, carbohydrates, and mineral salts. It makes this prebiotic\* one of nature's most complete liquid seaweed supplements (+2% molasses for palatability).

*\*Prebiotics are a type of fibre the body cannot digest. They serve as food for probiotics, and when Nutra-Kel is teamed with BioBoost – Daviesway's oral probiotic – the results can be game-changing.*

Nutra-Kel includes NO UREA or medicinal substances, and it is NASAA Certified\*\* Organic (NCO) certified.

## IDEAL AS AN ORAL TONIC

Nutra-Kel is ideal to be used as an oral tonic (or fed daily in milk or water) during sickness and/or recovery for calves and cows. It also restores valuable nutrients during and after climatic challenges.

## AN IMPORTANT FIRST STEP

Cindy says that within her day-to-day management, Nutra-Kel buys her time.

*"If I'm concerned about any calf, the first thing they get is 10ml of Nutra-Kel and BioBoost. That way, I'm giving them a prebiotic and a probiotic at the same time.*

It also offers an easy way to incorporate vitamins and minerals.

*"It buys me time and gives them a boost. So, when I finish feeding the rest of the calves, I can then assess them more closely to see what the problem is, and if they need electrolytes or other supportive treatments.*

*"I also use it when calves are recovering, and they love it."*

## INEXPENSIVE AND EFFECTIVE

Another big-time bonus, Cindy says, is that Nutra-Kel can be added daily to milk or water, as an *"inexpensive option to support and boost the underlying health and vitality of my calves."*

*It also offers a non-invasive way to incorporate vitamins and minerals.*

*"For people who use injectable vitamins or multi-minerals, Nutra-Kel offers a great alternative. Especially, as it's fortified with vitamin A, D and E. It's also kinder on the calf, cost-effective, and includes the natural benefits of pure sustainably-sourced Tasmanian kelp.*

## CINDY LUCAS

*Calf rearing specialist – Daviesway*

Mobile: 0427 192 421

Email: [cindy.lucas@daviesway.com.au](mailto:cindy.lucas@daviesway.com.au)

*\*\*NASAA Certified Organic (NCO) is issued by The National Association for Sustainable Agriculture Australia. It certifies organic commodities meet all domestic and international export market requirements, and is recognised globally as upholding the highest standards of integrity and benchmarks for the industry.*

## GENERAL DOSAGE RATES

<b>Cattle</b>	<b>40ml</b>
<b>Horses</b>	<b>25ml</b>
<b>Calves, Alpacas &amp; Pigs</b>	<b>10ml</b>
<b>Sheep &amp; Goats</b>	<b>5ml</b>

• *Dosage rates are a guide only.*

In stressful conditions, a single dose 10x the general dose rate can safely be used.

During joining, a single dose 5x the general dose rate one week before joining (or calving) can support fertility (and ease calving complications).

- Recommended to be used as an oral tonic for calves, which are off their milk, sick, dehydrated or stressed.
- Dose rate: 10ml Nutra-Kel via oral syringe (plus 5g BioBoost probiotic paste for best results).
- Also useful in adult cattle to improve fertility and/or support calving.
- Suitable for all animals.

## PRODUCT ANALYSIS

Nitrogen 0.05%, Phosphorus 0.01%, Potassium 0.94%, Sulphur 0.37%, Calcium 0.09%, Magnesium 0.15%, Sodium 0.19%, Iron 114ppm, Manganese 3.25ppm, Zinc 952ppm, Copper 674ppm, Cobalt 0.01ppm, Boron 19.2ppm, Molybdenum 0.18ppm, Organic Carbon 1.73%, Vitamin A, D and E

## ADMINISTRATION

Feed directly, add to feed, add to water source or via lick block.
