

Calf Klenz

Calf Klenz is a liquid alkaline detergent that comes with some welcome advantages for calf rearers:

- No odour.
- Effective cleaning at hand-washing temperatures.
- Medium foaming.
- Biodegradable.
- Spray rinse with warm or cold water.
- Residue safe.
- Rubber doesn't deteriorate because of the more comfortable temperature range.

NEW

GENERAL CLEANING:

1. Rinse soiled items immediately after using them with warm water for the most efficient cleaning preparation – 98% of milk residue is removed when rinse water is at blood temperature.
2. Prepare Calf Klenz wash solution in a tub or bucket using 30ml per 10 litres of warm to hot water (30°-60°C).
3. When mixing Calf Klenz, add the product to the water. Do not add the water to the product.
4. Final rinse with hot or cold water.

PRESSURE CLEANING FOR TANKER FEEDERS AND MILK TAXIS

1. Rinse feeder immediately after using it with warm water for the most efficient cleaning preparation – 98% of milk residue is removed when rinse water is at blood temperature.
2. Connect pressure cleaner chemical line to Calf Klenz wash solution container.
3. Pressurise with hot water for the best results.
4. Final rinse with hot or cold water.

QUALITY CALF REARING EQUIPMENT, NUTRITION & HYGIENE SOLUTIONS

STALLION – FEEDING EQUIPMENT

MINI MIXER TANKER

Compact and easy to use the mobile MT250 is real time saver.

With a 12-volt dispensing pump for feeding and a 240-volt mixing pump, the MT250 can mix 250 litres of milk replacer in 5-7 minutes – suitable for 80-100 calves.

Bonus feature:

You will love the tank's self-cleaning feature.

NEW

MT250 – single axle (250L tank)

1090H x 765W x 1520L

Self-cleaning, self-mixing and self-distributing mobile feeder

FEEDERS (COMPARTMENT & NON-COMPARTMENT)

Complete range of sizes available, thoroughly tested and proven to effectively feed calves from day one through to weaning.

NEW

290H x 320W x 800L

5X5-LITRE COMPARTMENT MILK FEEDER

This new-generation 5x5-litre compartment feeder finally gives producers the power to stay in-step with industry advances.

Traditional feeders historically include the 2-litre individual compartments, with the rest of the feeder capacity being shared between all the calves.

It favours the stronger calves who take more of the additional overflow milk than the slower drinkers.

This 5x5-litre feeder gives dedicated calf rearers a new level of confidence – because every calf gets its full feed – regardless of how fast it drinks it.

NON-COMPARTMENT 20 TEAT FEEDER
160L – 940H x 1120D

CALF KLENZ LIQUID ALKALINE DETERGENT

Specifically formulated to clean the toughest grime from calf trailers, calf buckets and calf feeders.

NEW
