

UDDAGARD

IODOPHOR TEAT SANITIZER CONCENTRATE

To assist in the control of mastitis in dairy cows and aid in preventing teat cracking

Uddagard contains 1% iodine destroying mastitis causing bacteria. Including glycerine to keep the teat soft and provides a skin which retains the iodine. Used as spray or dip it is mixed with equal parts of clean water to avoid detailed mixing instructions for milking staff.

Dosage and Administration:

To make a minimum of 0.5% available iodine in the final solution dilute 1 part of Uddagard to 1 part clean water. Unused mixture may be used at the next milking, provided it is not contaminated.

Additional emollient may be included to a maximum of 10%.

If washing is required for heavily soiled teats, ensure they are properly dried. Thoroughly spray or dip teats after every milking

Available in 20L, 110L & 200L Drums
