

“Never lose another vat of milk”

HALO Milk Monitoring System

Ultimate tool for managing milk in the vat

A unique network of equipment sensors are installed with programmed alerts set to protect your milk. Become more efficient and profitable with Halo.

- HALO MILK MONITORING SYSTEM IS SOLAR POWERED
- Receive text/email alerts when refrigeration fails, or falls outside of prescribed limits
- Monitor Milk Vat temperature
- Monitor Primary Cooler and Chiller
- Monitor hot wash temperature and cleaning
- Monitor inlet and outlet valve position
- Data is recorded and kept for future reference
- HALO works with single and dual vats.

Choose the HALO Starter Pack or add optional extras to suit your monitoring requirements.

“Summer time is always a problem for me with the power tripping and other related issues. We installed Halo in November 2016 and it’s already saved me over 8 vats of milk. Great product, very easy to use.”

Anthony McLean – Dairy Farmer (Northern Victoria)
